Brand spaces kept in sync via search infrastructure

1st

Company-wide E2E testing guide, authored solo

PROFILE

Full-stack engineer specialized in React, TypeScript and Node.js, with a track record of turning frontend work into measurable business outcomes: fewer support tickets, faster load times, reliable search. Brings a product-ownership mindset shaped by prior experience founding and running a B2B wholesale and logistics business, where every technical decision was also a P&L decision. Comfortable owning a feature end to end, from UI through testing infrastructure to production monitoring.

PROFESSIONAL EXPERIENCE

Full-Stack Developer · Drukwerkdeal (Cimpress)

Jun 2025 – Sep 2026

Deventer, NL

RESPONSIBLE FOR complaints flow UI, dashboard performance, E2E test infrastructure, search sync

- Core contributor to the multi-step complaints form in React/TypeScript, driving a 50% reduction in dissatisfied-customer support contacts.
- Rebuilt the My Account dashboard with lazy loading, splitting a 421 KB bundle into 19 on-demand chunks and cutting initial load to 105 KB, removing 300+ KB of unused code.
- Designed and built the company's Playwright E2E suite for critical flows, with multi-environment auth, and authored the Playwright Testing Guide now used as the team standard.
- Contributed to the Contentful-to-Algolia webhook sync across three brand spaces (Drukwerkdeal, Printdeal, Impresto), replacing a full reindex with a partial/incremental sync as part of a small team, keeping Help Center search current.
- Managed feature flags and A/B test overrides via Statsig; monitored serverless flows with AWS Lambda and CloudWatch.

STACK React, TypeScript, Node.js, Contentful, Algolia, AWS Lambda, CloudWatch, Statsig, Playwright, Jest, GitLab CI/CD

Freelance Developer

2023 – Present

Remote

RESPONSIBLE FOR end-to-end app builds, CMS integration

- Built performant web applications with React, TypeScript, Redux Toolkit, Tailwind CSS and Firebase.
- Integrated Contentful with custom frontends to streamline dynamic content management.

Full-Stack Developer Intern · HackYourFuture

Jan – Oct 2024

Netherlands

RESPONSIBLE FOR frontend state management, API integration

- Architected frontend state management and integrated REST APIs with Node.js in a 6-person Agile/Scrum team.
- Built a full-stack web application from scratch as the bootcamp capstone project.

Software Engineering Intern · EPAM Systems

Feb – Dec 2022

RESPONSIBLE FOR UI components, test reliability

- Built reusable React UI components and improved UI/UX across the application.
- Improved application reliability with Jest unit tests and optimized SQL query execution.

Business Owner / Director · Wholesale & Logistics

2020 – 2022

Ukraine

- Founded and directed a regional B2B wholesale distribution and logistics business supplying retail networks.
- Owned warehouse operations, supply chain logistics, B2B sales strategy and financial risk planning end to end.

Ship what matters. Measure what you ship.
